Ohio | Governor's Office of Health Transformation | **Executive Order**

Our purpose is to plan for the long-term efficient administration of the Ohio Medicaid Program, act to improve overall health system performance, and in the next six months:

1. Advance the Administration's Medicaid modernization and cost-containment priorities in the operating budget;
2. Initiate and guide insurance market exchange planning;
3. Engage private sector partners to set clear expectations for overall health system performance; and
4. Recommend a permanent HHS organizational structure and oversee transition to that permanent structure.

Better health, better care, and cost savings through improvement

- Specific budget recommendations
- Specific high-risk, high-cost medical “hot spots”
- Best practices to rebalance long-term care, integrate behavioral and physical health care, and/or improve care coordination
- Common sense regulatory changes
- Federal health care reform options Ohio should act on
- Current initiatives that should continue, or that have run their course and should be cut loose
- Problems in the system today that create barriers to better health, better care, and cost savings through improvement
